## OBJECTIVE

I am a graduate student looking for opportunities in **Front-end**, **Back-end**, and **Mobile Development** with a background in **Software Engineering** and **UI Design**

## EDUCATION

Universitas Muria Kudus | Kudus, Central Java, Indonesia

*Bachelor of Informatics Engineering* • 2019 - 2023

- Final GPA: **3.67**
- Thesis: **Implementation of Convolutional Neural Network With Deep Learning In Study Case Rice Leaf Disease**

## WORK EXPERIENCE

**aiBase** • Frontend Engineer | United States, Remote

- Developing and maintaining frontend side of machine learning self-service platform with Typescript and React.
- Collaborated with the team to design and implement new features.
- Optimized application performance and reduced response times.

September 2022 - Present

**Kleinanzeigen Enhanced** • Full Stack Engineer | German, Remote

- Developed and maintained Ads' management platform with Microservice architecture
- Developed and implement business logic backend side with Laravel and NodeJS.
- Slicing Figma design to React app and connect to backend API

June 2021 - February 2022

**PT Anugerah Cipta Kreatif** • Mobile Application Developer | Indonesia, Remote

- Design and developing cross-platform E-commerce app using React Native (Typescript).
- Connect to backend API and implement the business logic.
- Implementing best practices to enhance performance and user experience.

April 2020 - October 2020

## PROJECT

### NGEEVENT

September 2023 - Present

### CO-FOUNDER and CTO

Mobile Application used to share information on various events local or outside region with have marketplace inside the app

- Design business flow with InVision and Help Micro UI Design in Figma
- Initial backend side and implement the business flow with AdonisJS and Typescript
- Slicing Figma UI Design into Flutter Widget

Aug 2022 - September 2022

Solution in the form of an application that can be used to digitize old documents

- Developing Desktop app with Electron and Typescript
- Design and implement the UI with React and AntDesign
- Integrate sqlite for local database and implement communication to printer with IPC

## SKILL

### Web UI

- React & Next
- Tailwind, MUI, AND
- Redux Saga, Toolkit
- Webpack, Vite

### Backend/Full Stack

- AdonisJS
- ExpressJS
- Laravel

### Mobile App

- Kotlin
- Flutter
- React Native

### Programming Languages

- Javascript
- Typescript
- Dart
- PHP
- Java, Kotlin

## Language

My **native** language is **Indonesian**, but I am also very good at using **Javanese**. In **English**, I am quite **proficient** in **reading**, **writing** and **listening** but in **speaking** I can say still in **Intermediate**.
